SAMPLING OF PAST PERFORMANCE

Contract Number: M68909-19-D-7605 Program / Project Title: Marine Corps Tactical Systems Support Activity (MCTSSA) Period of Performance: March 2018 –March 2032 PPQ Available Upon Request	Description of Services: F2 Systems (F2) provides non-personal, technical service support efforts to C4PS (prime contractor) to meet the Fleet Marine Force's tactical systems and applications support requirements. The primary objective of this service is to provide continuous, worldwide tactical systems technical support, positioned at distinct global locations, to the Fleet Marine Force during the full range of military operations in order to ensure that Marines can successfully and independently employ and operate their tactical systems. This includes the development of a Tier 0 website, the establishment of a 24/7 Tier 1 Help Desk, and a cadre of globally distributed, deployable Tier 2 tactical systems experts. This support includes, but is not limited to, remote and on-site tactical systems and applications, website and portal development/maintenance, troubleshooting and issue resolution, setup and configuration, configuration management, information and knowledge management, SharePoint development and administration, software and documentation distribution, maintenance procedures, operations, network analysis, and diagnostics, engineering, and over-the-shoulder training. TSS is provided to various units Marine, Joint Services, Coalition Partners (IAW applicable FMS agreements), and other US agencies that are in garrison, deployed abroad, on ships, or in combat/hazardous duty zones and preparing for or conducting a full range of military operations.
Contract No.: HC1028-24-D-0003 Prime Task Order No.: HC1028-24-F-1057; F2S-04485-1057 Agency: JITC; TEC II Geospatial-Intelligence (GEOINT) Test, Evaluation, and Certification (TEC) Period of Performance: Aug 2024-Mar 2029 PPQ Available Upon Request	Description of Services: F2 Systems provides programing, development and maintenance support for Geospatial-Intelligence (GEOINT) standards conformance and interoperability test services initiated at the Joint Interoperability Test Command (JITC). JITC has added new test services supporting standards conformance testing for related GEOINT standards and performing interoperability assessment services for the National Geospatial-Intelligence (NGA)'s Test Organization (NTO) in the Certification-to-Field of NGA GEOINT services. Our programmers are building, developing and maintaining the GEOINT-TEC test suite software (e.g., CIVA, MI parsers, MTI parsers) and data sets (e.g., NITF, MTI, MI, NIT, etc.) for the lifecycle of the RDT&E Interoperability testing and developing/maintaining/updating the software during the various complexity levels of testing for all phases supported under this contract.
Contract Number: M67854-17-D7901/ TC217D7901F2S Program/Project Title: Communication Training Centers (CTC) Period of Performance: July 2017- July 2022 PPQ Available Upon Request	Description of Services: F2 Systems provided instructional services, Curricula Development, Curricula Management, and Test Administration for the courses in support of the CTC for the MEF. Our instructor/developers' created curriculums for new courses required by the Department of Defense and the Marine Corps Information Assurance (IA) professionals. Courses varied in length and complexity along with delivery forums. F2 provided curriculum management: instructors/developers responsible for updating existing curricula as technological Tactics, Techniques and Procedures (TTPs) are implemented. Our instructors taught a broad portfolio of courses in support of the USMC's training and operational directives: Instructors administer test and assessment to gauge students understanding and knowledge retention. Instructors worked in conjunction with the Prime to ensure adequate scheduling, to include availability of instructors, facilities, learning aids and resources.
